

Origami Whale

Download and print this template to create your own whale origami.

What you will need:

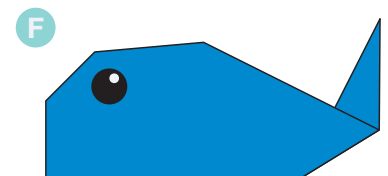

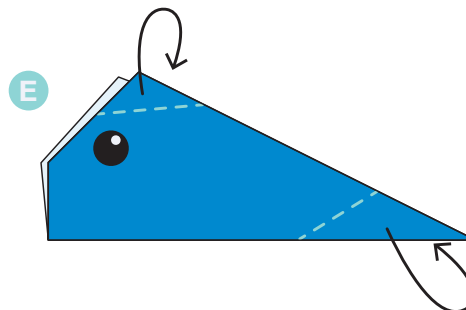

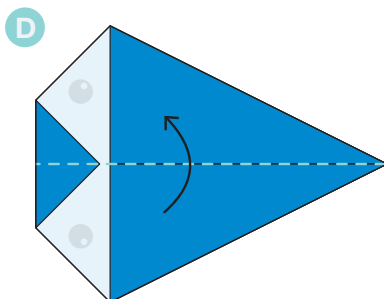

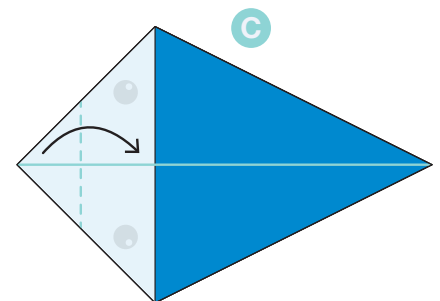

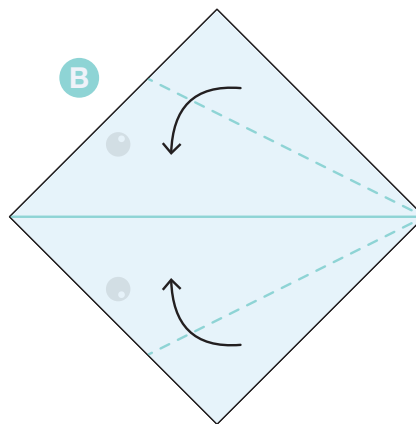

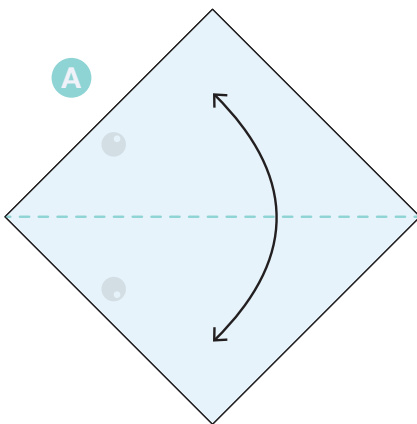

Paper

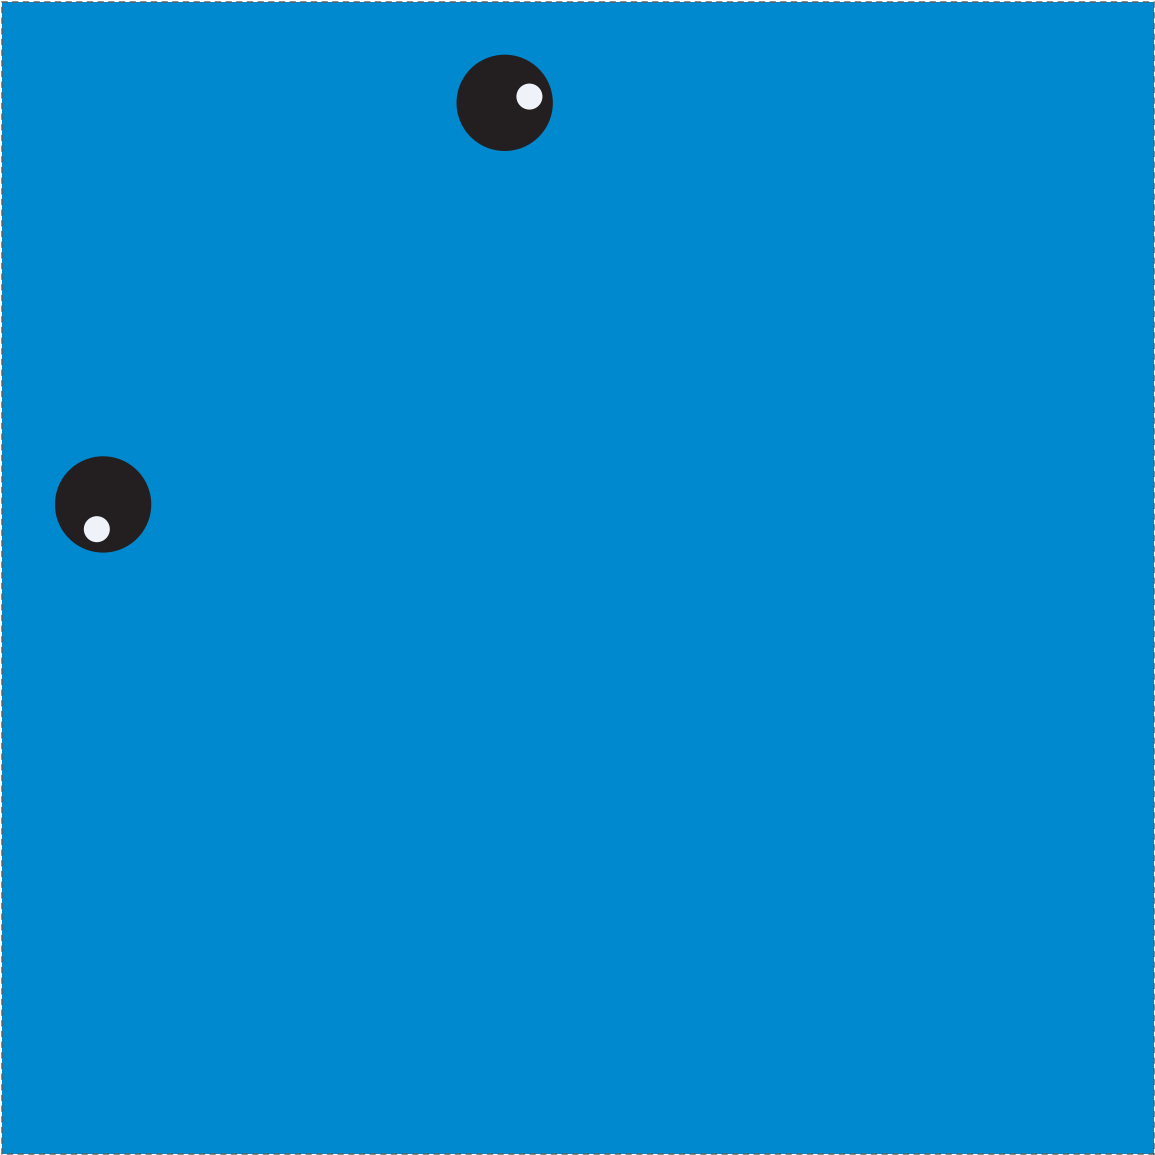

Scissors*

**Kids, ask an adult to help!*

Instructions:

1. Carefully cut out the 6-by-6-inch square along the solid lines and place it face-down at a 45-degree angle (diamond shape) with the eyes on the left side.
2. Fold the top corner to the bottom corner and then unfold to create a crease through the middle of the diamond (see Figure A).
3. Fold in the two right edges from the right corner so that the edges meet at the middle crease (see Figure B).
4. Fold in the left corner so that it meets the other two folded-in corners along the middle crease (see Figure C).
5. Fold in half along the middle crease (see Figure D).
6. Fold in the top corner on each side so that they are hidden on the inside of the whale.
7. Fold up the right corner to create the tail (see Figure E).
8. Well done! Your origami whale should now resemble the whale shown in Figure F.
